Estimated colour result

Colour reference profile

CIELAB nearest reference (Delta E 1976)

What do these results mean?

Colour-based estimates

Results estimate the closest category in the supplied colour reference. Categories describe colour matches, not normal ranges or measured concentrations. These estimates are not clinically validated.

Lower colour category

0

Category 1 · No pads classified

Intermediate colour category

0

Category 2 · No pads classified

Higher colour category

10

Category 3 · Glucose, Bilirubin, Ketones, Specific gravity, Blood, pH, Protein, Urobilinogen, Nitrite, Leukocytes

Higher-category colour matches detected

Glucose, Bilirubin, Ketones, Specific gravity, Blood, pH, Protein, Urobilinogen, Nitrite, Leukocytes

Review the listed higher-category matches and discuss the results with a doctor. This is not a medical emergency assessment.

Always consult a doctor

Always consult a qualified doctor about your results. This application provides unvalidated colour-based estimates, not a diagnosis. It cannot determine whether a result is normal, abnormal or critical. Do not use it to start, stop or change treatment.

PARAMETER	BASIC INTERPRETATION	EXPLANATION
Glucose Urine sugar screening marker.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
Bilirubin A bile pigment associated with red blood cell breakdown.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
Ketones Substances produced during fat metabolism.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.

PARAMETER	BASIC INTERPRETATION	EXPLANATION
Specific gravity A measure related to how concentrated urine is.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
Blood Screening for a blood-related reaction on the pad.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
pH How acidic or alkaline urine is. Higher pH means more alkaline, not automatically more severe.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
Protein Screening for protein in urine.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
Urobilinogen A pigment formed during bilirubin breakdown.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
Nitrite A screening marker that may be associated with certain bacteria. It is not a general severity scale.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.
Leukocytes Screening for a white-blood-cell-related reaction.	Higher colour estimate	Closest to colour category 3. Review this higher-category match with a doctor; it does not establish abnormality or urgency.

▸ **How to read the colour measurements**

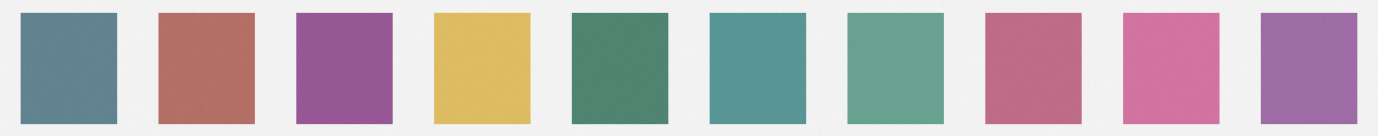

General background: **MedlinePlus — Urinalysis**. General information does not validate this application's colour estimates.

Colour matching details

Values are labels from the supplied profile. Small Delta E means a closer colour match. “Review” marks a near tie between reference colours.

PAD / PARAMETER	MATCHED CATEGORY	MEASURED COLOUR	REFERENCE COLOUR	DELTA E	REVIEW
1. Glucose	**Colour category 3**	98, 132, 144	92, 135, 142	4.42	—
2. Bilirubin	**Colour category 3**	180, 111, 103	174, 115, 100	5.3	—
3. Ketones	**Colour category 3**	152, 88, 150	146, 91, 146	4.84	—
4. Specific gravity	**Colour category 3**	221, 188, 98	215, 192, 96	4.95	—
5. Blood	**Colour category 3**	80, 134, 113	74, 137, 110	4.72	—
6. pH	**Colour category 3**	89, 150, 150	83, 154, 146	5.86	—
7. Protein	**Colour category 3**	105, 162, 145	99, 165, 143	4.19	—
8. Urobilinogen	**Colour category 3**	190, 108, 136	184, 112, 133	5.06	—
9. Nitrite	**Colour category 3**	210, 115, 161	204, 118, 157	4.58	—
10. Leukocytes	**Colour category 3**	159, 109, 166	153, 113, 164	4.92	—
